

GPLv3 RELEASE OF AUCTION PRO PROJECT

The screenshot shows the 'Auction Pro Live Terminal Window'. It displays a table of auction items with columns for Bid #, Name, Item #, Item Name, Price, Qty, Total, Act, and Rec. The items are sorted by most recent processed on top. The table includes various items like 'San Geronimo Y4 used', 'Nebagamon NQAC 1998 Area 51', and 'Wiatava 2000 Y2K full set'.

On a personal note, please excuse my horrible coding methods as an 18-year old. The project started before software methodologies and best-practices were discovered in my career.

Yours in Service, always
